PERSONAL STATEMENT

For over eight years, I have been working professionally as a front-end developer. Most of my work has been centered around designing and developing interactive product demos for touch screen devices: iPads, iPhones, touch screen computers and TVs. I specialize in making the ordinary memorable through animations and simple, clean user interfaces.

My ideal career is one in which I can use my creativity to solve complicated UX/UI challenges and code those solutions.

RECOGNITION

WORK EXPERIENCE

6⁴

From 05/2010 to current
Interactive Designer/Developer
Unboxed Technology
Richmond, VA

- Development of the Comcast Mobile Experience, an interactive application built to display on iPads and touch screen tvs within a mobile, popup display unit around the country
- Design and development of approximately twenty-five interactive, assisted selling modules and business-specific calculators, created in Javascript, CSS, Flash and AngularJS
- Creation of animated, informational videos for Comcast, nTelos, and CarLotz, using a Flash to AfterEffects workflow that I created to expedite development time
- Development of Time Warner Cable's Intelligent Home webpage, used to recommend home security products
- Estimation and evaluation of product requirements, brainstorming, designing and prototyping of the UI, usability testing of interface prototypes
- Collaboration with product managers to concept UX/UI interfaces
- Working with QA team to quickly resolve issues
- Editing and optimizing video and audio for web performance
- Creating SCORM compliant eLearning modules
- Development and editing of screen captures

1¹

From 03/2009 to 01/2010
Flash Developer
BYTEJAM
Richmond, VA

- Turned Photoshop comps into functional, pixel for pixel websites and Flash widgets
- Worked with agencies to alleviate technical limitations and propose solutions

1⁴

From 09/2007 to 01/2009
UX/UI Developer/Designer
TechHead - Circuit City
Richmond, VA

- Developed over twelve Flash-based product demos to aid The City (Circuit City's concept stores) employees in demonstrating retail technology concepts
- Created interactive selling assistants for firedog, which helped to boost sales from \$200k to \$400k
- Produced interactive Flash educational product aids for HP TouchSmart computers, prompting Hewlett Packard to delegate three machines per City location

FREELANCE WORK

- Full creation of Richmondradio.org, a local music portal, winning the Adobe Site of the Day Award in 2008
- Developed UX/UI animations for Dell's Live and Learn™ Employee Portal
- Design and development of the Dell Solution Station, an assisted sales tool, incorporating multiple touchscreen interactive product demonstration modules to help sell PCs and accessories in Walmart stores
- Development of the Center of The Universe check in iPad app
